

## **RECORD OF DECISIONS FROM AUGUST 16, 1999 MEETING**

### **ACTION ITEMS**

1. Adopt Record of Decisions from the May 24, 1999 meeting.

**Record of Decisions for the May 24 meeting was approved on a 2-0 vote.**

2. Approve the Revised Land Management Plan.

**Based upon a recommendation from Travis County staff that additional time be given to the public for review of the Revised Land Management Plan due to difficulties in distributing the document to public libraries for timely public review, the Coordinating Committee members agreed that the document production schedule had been overly ambitious and postponed consideration of any action on the Revised Land Management Plan until a future meeting date.**

3. Set Future Coordinating Committee Meeting Dates.

**The Coordinating Committee members identified September 8, 1999 as the next Coordinating Committee meeting date, contingent upon successful meeting arrangements. This date will allow an additional three weeks for public review of the Revised Land Management Plan before taking action on submittal of the LMP to the U.S. Fish and Wildlife Service.**

### **CITIZEN COMMUNICATIONS**

Due to the deferral of the Land Management Plan discussion and the overall length of the meeting, citizen communications were abbreviated. The Coordinating Committee received direct communications from the following persons:

**Skip Cameron (Bull Creek Foundation)** – Mr. Cameron provided the Coordinating Committee members with written copies of additional suggested revisions to the LMP. He insisted that “the people” be put back into the process at the BCP. He wants the BCP to get serious about research between the species and the urban environment (public), similar to experiments being conducted at Fort Hood.

**Florence Hite (Bull Creek Equestrian Association)** – Ms. Hite made reference to the research conducted by John Cornelius on cowbirds at Fort Hood as the type of research that should be done by the BCP.
